PROFESSIONAL SUMMARY

Seasoned Software Engineer and Project Delivery Leader with 12+ years of experience successfully delivering scalable, secure, enterprise-grade applications on time and within budget. Expert in Java (8/11/17), Python (data science, automation, backend), Node, Spring Boot, microservices, and modern front-end frameworks (Angular, React). Proven track record of leading cross-functional teams, driving successful migrations, managing complex project portfolios, and streamlining delivery pipelines. Strong background in agile project management, stakeholder engagement, risk mitigation, and DevSecOps best practices.

CORE COMPETENCIES

Project & Delivery Management: - Agile & Scrum Leadership: SAFe, Scrum Master practices, Sprint planning, Release management, Roadmap planning - Stakeholder Management: Executive reporting, Cross-functional team alignment, Client/partner coordination - Risk & Schedule Management: Risk assessment, Mitigation strategies, Schedule optimization, Change control - Quality & Process: Continuous improvement, Process optimization, Quality gates, SLA management - Team Leadership: Technical team mentoring, Performance management, Knowledge transfer, Capacity planning

Technical Management: - Java & Backend: Java 8/11/17, Spring Boot, Spring MVC, Spring Cloud, Spring Security, Hibernate/JPA - Python & Data Science: Python 3.x, Data Science libraries (Pandas, NumPy, Scikit-learn), Jupyter, Analytics & Reporting - Frontend: Angular (1.x → v12+), React, TypeScript, JavaScript, HTML5, CSS3 - Microservices & Integration: REST, gRPC, Kafka, RabbitMQ, API Gateway, OAuth2/OIDC, Okta - Cloud & Containers: AWS (EC2, ECS/EKS, Lambda), Azure, GCP, Docker, Kubernetes, OpenShift - DevOps & CI/CD: Maven, Gradle, Jenkins, GitLab CI, Azure DevOps, CodePipeline, CodeDeploy, Python automation scripts - Data & Persistence: PostgreSQL, MS SQL Server, Oracle, MongoDB, DynamoDB, Redis - Testing & Security: JUnit, Mockito, TestNG, Selenium, Pact/Contract Tests, SonarQube, Fortify, pytest, unittest - Observability: Prometheus, Grafana, DataDog, Splunk, CloudWatch

PROFESSIONAL EXPERIENCE

Senior Java Full Stack Consultant — CitizensBank, US

March 2022 – Present - **Delivered** student lending platform using Spring Boot microservices and SPA front-end (Angular/React); led requirements gathering, design reviews, and release coordination across product and engineering teams. - **Architected and managed** domain-driven services, REST APIs, and event-driven workflows with Kafka for loan lifecycle processing; established delivery cadence and automated testing gates. - **Led cross-functional migration initiative** transitioning legacy pipelines to Maven/Gradle, Docker, and Kubernetes/OpenShift; managed stakeholder communications and phased rollout to eliminate deployment risks. - **Managed vendor partnerships** with Platform and DevSecOps teams to standardize artifact repositories, implement container scanning, and establish enterprise pipeline templates; achieved 40% faster release cycles. - **Implemented SSO security architecture** with Okta and OAuth2; championed automated testing adoption across squads, reducing regression defects by 65%.

Manager, Solutions Engineering — Western Union, Pune, India

December 2021 – February 2022 - **Directed engineering delivery** for fraud monitoring and regulatory platforms using Java microservices and containerized test harnesses; managed team of 8 engineers and coordinated with compliance stakeholders. - **Implemented project acceleration initiatives** including synthetic testing frameworks, regional deployment strategies, and automated release tooling; improved QA cycle time by 35%. - **Managed program roadmap** spanning fraud detection, reporting compliance, and DevOps enablement across multiple product teams and geographies.

Senior Applications Architect — Western Union, Denver, CO

September 2017 – November 2021 - **Led enterprise program** for Compliance Hub cloud migration from

legacy monolith to Spring Boot microservices with multi-cloud exit strategy; coordinated 15+ engineers across platform and compliance domains. - **Delivered transaction-monitoring and reporting systems** leveraging Kafka streaming; managed product requirements, technical design reviews, and 12-month implementation roadmap. - **Established automated DevOps governance** (Jenkins, Ansible, Liquibase); eliminated manual deployments and reduced mean time to production from 6 weeks to 3 days. - **Mentored technical leaders** on architecture patterns, deployment strategies, and incident management; established delivery standards across organization.

Applications Architect — Bureau of Labor Statistics (BLS), Washington DC

April 2016 – September 2017 - **Directed modernization program** transitioning legacy desktop and applet systems to Angular-based SPAs backed by Java REST APIs; managed government stakeholder requirements and accessibility compliance. - **Implemented CI/CD infrastructure** and automated testing practices; enabled continuous delivery for public data portals serving millions of users. - **Coordinated with executive stakeholders** to prioritize digital transformation initiatives and manage budget allocation.

Production Support Consultant — Fannie Mae, Reston, VA

November 2013 – March 2016 - **Managed operational excellence** for critical ETL and reporting systems; established SLAs and automated incident response procedures. - **Implemented proactive monitoring framework** and health reporting dashboards; reduced unplanned outages by 70%. - **Administered job orchestration** with AutoSys; optimized batch schedules for millions of daily transactions.

Technical Delivery & Project Manager — Phaeros IT India Pvt. Ltd., Chennai

April 2005 – September 2013 - **Delivered enterprise Cargo and Billing solutions** for international logistics clients; managed teams of 12-15 engineers and coordinated with offshore/onshore resources. - **Led end-to-end project delivery** spanning requirements analysis, design, implementation, and deployment; consistently delivered on-time and within budget. - **Designed and implemented** modular architecture frameworks, message interchange systems, and high-volume transaction processing components. - **Managed vendor relationships** and third-party integrations; negotiated SLAs and ensured service level compliance.

LAN Executive — Blue Dart Express Ltd, Chennai, India

June 1994 – March 2005 - **Managed network and server infrastructure** for 500+ user enterprise; supervised IT operations team and infrastructure budget. - **Developed automation scripts** and operational IT processes; improved uptime to 99.8% and reduced helpdesk tickets by 45%.

TECHNICAL SKILLS

Category	Tools & Technologies
Languages & Frameworks	Java (8/11/17), Spring Boot, Spring Cloud, Hibernate, JPA, Python 3.x, JavaScript, TypeScript
Python & Data Science	Pandas, NumPy, Scikit-learn, Matplotlib, Plotly, Jupyter, BeautifulSoup, Requests
Frontend	Angular (1.x → v12+), React, HTML5, CSS3
Cloud & Containers	AWS (EC2, ECS/EKS, Lambda), Azure, GCP, Docker, Kubernetes, OpenShift
CI/CD & Build	Maven, Gradle, Jenkins, GitLab CI, Azure DevOps, CodePipeline, Python automation
Databases	PostgreSQL, MS SQL Server, Oracle, MongoDB, DynamoDB, Redis
Testing & Security	JUnit, Mockito, TestNG, Selenium, Pact, SonarQube, Fortify, pytest, unittest
Observability	Prometheus, Grafana, DataDog, Splunk, CloudWatch

PROJECT MANAGEMENT CREDENTIALS

- SAFe 4 Practitioner — Feb 2019

- Agile & Scrum methodologies
- Change management & program governance
- Risk assessment and mitigation
- Vendor management and SLA negotiation

EDUCATION

Master's in Computer Applications (MCA) — Bharathidasan University, Trichy, India (2000–2003)

Bachelor's in Physics — University of Madras, Chennai, India (1991–1994)

CERTIFICATIONS

- Google Cloud Certified Associate Cloud Engineer — Dec 2019
- Microsoft Certified Azure Fundamentals — Nov 2019
- Data Scientist with Python Track (DataCamp) — Sep 2019 (ID 101428)
- SAFe 4 Practitioner — Feb 2019
- MongoDB for .NET Developers — Mar 2017
- M101J: MongoDB for Java Developers — May 2017

RIGHT TO WORK

Authorized to work in the USA on H1B (valid through October 2027)

PROFESSIONAL RECOMMENDATIONS

“AJ is a clear-headed thought leader in systems development space. I had the honor of collaborating with him in .NET development initiatives both on-prem and in AWS.”

— Dan Fleisher

“Aravindh is skilled, passionate, motivated, and takes initiative. A strong team player with quick problem-solving and fast learning ability.”

— Roel Slangen

“An exceptional Solution Architect—well organized, flexible to project needs, and available for support. Strong hands-on experience with DevOps, Cloud architecture, and Database concepts.”

— Kamal K Baravathula

“AJ combines positivity and technical expertise. An expert software architect, avid learner, and patient coach.”

— Dmitry Gulin
