## PROFESSIONAL SUMMARY

Seasoned Java Full Stack Engineer with 12+ years of experience delivering scalable, secure, enterprise-grade applications. Expert in Java (8/11/17), Spring Boot, microservices, and modern front-end frameworks (Angular, React). Strong background in cloud-native architectures (AWS/GCP/Azure), CI/CD, observability, and DevSecOps. Proven ability to lead migrations, design resilient systems, and streamline delivery pipelines. Experienced in Infrastructure-as-Code (**Terraform**, **AWS CloudFormation**), and Privileged Access Management (**CyberArk**) for secure, auditable deployments and secrets management.

## KEY HIGHLIGHTS

- Cloud & IaC Leader: Designed and operated AWS environments (EC2, EKS, RDS) using **Terraform** and **CloudFormation** for repeatable, auditable provisioning.
- Secrets & PAM: Implemented **CyberArk**-based credential vaulting and rotation workflows across production pipelines to meet regulatory and audit requirements.
- DevSecOps: Integrated IaC templates into CI/CD with automated policy checks, SAST/DAST, and secret scanning to prevent leaks into repo/state.

## CORE SKILLS

- Java & Backend: Java 8/11/17, Spring Boot, Spring MVC, Spring Cloud, Spring Security, Hibernate/JPA
- Frontend & Full-Stack JS: Angular (1.x → v12+), React, **TypeScript**, JavaScript, **Node.js**, HTML5, CSS3
- Microservices & Integration: REST, gRPC, Kafka, RabbitMQ, API Gateway, OAuth2/OIDC, Okta
- Cloud & Containers: **AWS (EC2, EKS, RDS, Lambda)**, Azure, GCP, Docker, Kubernetes, OpenShift
- DevOps & CI/CD: Maven, Gradle, Jenkins, GitLab CI, Azure DevOps, CodePipeline, CodeDeploy, **Ansible**, **Liquibase**
- IaC & PAM: **Terraform**, **AWS CloudFormation**, ARM templates, **CyberArk**, HashiCorp Vault
- Data & Persistence: PostgreSQL, MS SQL Server, Oracle, MongoDB, DynamoDB, Redis
- Testing & Security: JUnit, Mockito, TestNG, Selenium, Pact/Contract Tests, SonarQube, Fortify
- Observability: Prometheus, Grafana, DataDog, Splunk, CloudWatch

## PROFESSIONAL EXPERIENCE

Senior Java Full Stack Consultant — CitizensBank, US

March 2022 – Present - Architected and implemented a student lending platform using Spring Boot microservices and SPA frontend (Angular/React). - Designed domain-driven services, REST APIs, and event-driven workflows with Kafka for loan lifecycle processing. - Migrated legacy pipelines to Maven/Gradle, Docker images, and Kubernetes/OpenShift deployments; improved release velocity and reliability. - Integrated Okta for SSO and implemented OAuth2-based API security; led automated unit/integration testing adoption. - Partnered with Platform and DevSecOps teams to standardize artifact repositories, container scanning, and pipeline templates. - Implemented Infrastructure-as-Code using **Terraform** and **AWS CloudFormation** to provision and maintain cloud environments; integrated **CyberArk** for secure secret storage, automated rotation, and controlled privileged access across environments. - Implemented configuration management and automated provisioning using **Ansible**; managed DB schema and release migrations using **Liquibase**. - Built server-side components and automation utilities in **Node.js** and **TypeScript** to support data processing, cron jobs, and lightweight APIs.

Manager, Solutions Engineering — Western Union, Pune, India

December 2021 – February 2022 - Led engineering for fraud monitoring and regulatory platforms using

Java microservices and containerized test harnesses. - Implemented synthetic testing, regional deployment strategies, and automated release tooling to improve QA and reliability.

Senior Applications Architect — Western Union, Denver, CO

September 2017 – November 2021 - Led cloud migration of a legacy Compliance Hub to Spring Boot microservices and container platforms with multi-cloud exit strategy. - Delivered transaction-monitoring and regulatory reporting solutions leveraging Kafka streaming and resilient integration designs. - Established automated DevOps pipelines (Jenkins, **Ansible**, **Liquibase**) to remove manual deployments and shorten lead times. - Authored reusable **CloudFormation** and **Terraform** templates for repeatable environment provisioning and implemented **CyberArk**-based credential vaulting and access workflows for production systems.

Applications Architect — Bureau of Labor Statistics (BLS), Washington DC

April 2016 – September 2017 - Modernized legacy desktop and applet systems to Angular-based SPAs backed by Java REST APIs; improved performance and accessibility. - Integrated CI/CD and automated testing to support continuous delivery for public data portals.

Production Support Consultant — Fannie Mae, Reston, VA

November 2013 – March 2016 - Supported ETL and reporting systems; automated monitoring and health reporting; implemented job orchestration with AutoSys.

Technical Delivery & Project Manager — Phaeros IT India Pvt. Ltd., Chennai

April 2005 – September 2013 - Delivered enterprise Cargo and Billing solutions; designed modular frameworks, message interchange systems, and high-volume transaction components.

LAN Executive — Blue Dart Express Ltd, Chennai, India

June 1994 – March 2005 - Managed network and server infrastructure, automation scripts, and operational IT processes.

## TECHNICAL SKILLS

| Category               | Tools & Technologies                                                                                                      |
|------------------------|---------------------------------------------------------------------------------------------------------------------------|
| Languages & Frameworks | Java (8/11/17), Spring Boot, Spring Cloud, Hibernate, JPA, JavaScript, <b>TypeScript</b> , <b>Node.js</b>                 |
| Frontend               | Angular (1.x → v12+), React, HTML5, CSS3                                                                                  |
| Cloud & Containers     | <b>AWS (EC2, EKS, RDS, Lambda)</b> , Azure, GCP, Docker, Kubernetes, OpenShift                                            |
| CI/CD & Build          | Maven, Gradle, Jenkins, GitLab CI, Azure DevOps, CodePipeline                                                             |
| IaC, Config & PAM      | <b>Terraform</b> , <b>AWS CloudFormation</b> , ARM, <b>Ansible</b> , <b>Liquibase</b> , <b>CyberArk</b> , HashiCorp Vault |
| Databases              | PostgreSQL, MS SQL Server, Oracle, MongoDB, DynamoDB, Redis                                                               |
| Testing & Security     | JUnit, Mockito, TestNG, Selenium, Pact, SonarQube, Fortify                                                                |
| Observability          | Prometheus, Grafana, DataDog, Splunk, CloudWatch                                                                          |

## EDUCATION

Master's in Computer Applications (MCA) — Bharathidasan University, Trichy, India (2000–2003)

Bachelor's in Physics — University of Madras, Chennai, India (1991–1994)

## CERTIFICATIONS

- Google Cloud Certified Associate Cloud Engineer — Dec 2019
- Microsoft Certified Azure Fundamentals — Nov 2019

- Data Scientist with Python Track (DataCamp) — Sep 2019 (ID 101428)
- SAFe 4 Practitioner — Feb 2019
- MongoDB for .NET Developers — Mar 2017
- M101J: MongoDB for Java Developers — May 2017

## RIGHT TO WORK

Authorized to work in the USA on H1B (valid through October 2027)

## PROFESSIONAL RECOMMENDATIONS

“AJ is a clear-headed thought leader in systems development space. I had the honor of collaborating with him in .NET development initiatives both on-prem and in AWS.”

— Dan Fleisher

“Aravindh is skilled, passionate, motivated, and takes initiative. A strong team player with quick problem-solving and fast learning ability.”

— Roel Slangen

“An exceptional Solution Architect—well organized, flexible to project needs, and available for support. Strong hands-on experience with DevOps, Cloud architecture, and Database concepts.”

— Kamal K Baravathula

“AJ combines positivity and technical expertise. An expert software architect, avid learner, and patient coach.”

— Dmitry Gulin
